

# L10 Rugged Tablets

The ultimate family of 10.1 inch 'go-anywhere' tablets

# L10 SERIES

**The rugged  
tablets that  
have it all.**

## The ultimate rugged work tablet

When it comes to choosing a rugged tablet design for your workers, the L10 has it all. The power and big screen real estate of a laptop. The portability of a tablet. And all the features you need to maximize workforce productivity — and your return on investment.

A big 10.1 inch screen to display the data your workers need to get the job done.

A rugged design built to thrive in demanding environments.

A choice of models to meet the need of practically any worker — and any job.

Two operating systems to meet your technology strategy requirements — Windows 10 Pro or Android 8.1.

Numerous integrated options and the largest accessory family in its class, delivering the ultimate in customization.

Up to 24 continuous hours of power on a single battery charge.

Lightning fast performance on all of your applications.

And fast WiFi and cellular connections to keep your workers up and running, no matter where in the world they are.

# Get the ultimate in flexibility

**Three models. Two operating systems. Five CPUs.  
One of the most flexible rugged tablets on the planet.**

## Pick your Model.

Three models meet the needs of different types of jobs and different types of workers. And if your needs change in the future, no problem. Just accessorize. For example, add a rugged keyboard to turn an XSLATE into an XBOOK. Or add a kickstrap and keyboard to an XPad and create an XBOOK with a hard handle for easy carrying.

### XSLATE L10

#### Lightest and smallest L10 model

When size and weight matter, give your workers this traditional tablet design — the smallest and lightest rugged tablet in the L10 family. Ideal in vehicles and job sites.

### XPAD L10

#### Integrated handle for easy carrying

An integrated handle makes the XPAD easy to carry — ideal for workers who spend the day on their feet, such as field workers in utilities or warehouse workers.

### XBOOK L10 2-in-1

#### Fully functional removable keyboard

If the job requires heavy data entry, the XBOOK gives your workers the best of both worlds — a rugged fully-functional keyboard that is easily attached and removed as needed.

## Pick your Processor.

Choose the CPU that fits your organization's needs or get a mix for different user types:

### For Windows

Choose from four CPUs to best meet business needs — or mix-and-match to get the right power for different types of users and applications.

### For Android

The Qualcomm Snapdragon 660 delivers blazing speed and ensures compatibility with other Zebra Android devices.

## Pick your OS.

Choose the operating system that meets the needs of your technology strategy:

### Windows 10 Pro

Instant plug-and-play for existing desktop apps on tablets enables easy integration — along with all the security and productivity that the latest, most advanced desktop OS offers.

### Android 8.1

Get the enterprise-class security and manageability needed to migrate to the world's number one mobile operating system to create intuitive apps that virtually eliminate training.

## Pick your Display.

Choose the right display for your applications, users and environments:

### Three Viewing Options

Standard 500 nit capacitive display for indoor and daylight viewing

View Anywhere® 1000 nit capacitive display for viewing in direct sunlight

View Anywhere® 1000 nit active digitizer display for viewing in direct sunlight and the best pen experience for signature capture, note taking, annotations and drawings, even in wet conditions.

# Customize it your way with the ultimate in mix-and-match accessories

Easily customize any L10 model to best meet your on-the-job requirements with the largest accessory family in this class. And virtually all accessories work with all models, simplifying purchasing and management.

## Docks

### Vehicle Dock

Easy one-hand release  
Optional five antenna pass-throughs for use with equipped Windows models  
Shock and vibration tested

### Industrial Dock

Ideal in the plant, warehouse or office  
Optional 4k port replicator for all the connectivity you can imagine

### Office Dock (Windows)

Transform the L10 Windows tablet into a full desktop  
Optional spare battery charging bay

## Batteries

### Standard Full-Shift

Up to 10 hours on a single charge  
Ideal for full shifts  
Hot swappable

### Extended Life Around-the-clock

Up to 27 hours on a single charge  
Ideal for extended shifts  
Hot swappable

### Kickstand Extended Battery Bracket

Allows tablet to stand upright or lie flat  
Simplifies use in the field with or without the companion keyboard  
Fully adjustable viewing angle

## Miscellaneous

### Shatter-Resistant Screen Protector Film

Protects against scratches and wear  
Reduces glare and reflection  
Clear/sharp viewing in all lighting

## Cases

### KickStrap<sup>1</sup>

Combination kickstand and rotating hand strap  
Brings desktop convenience to field mobility

### Soft Handle

Attaches to top of tablet  
Smooth, durable rubber  
Maximum comfort and grip  
Integrated long pen garage

### Shoulder Strap

Attaches to top handle accessory  
Adjustable length  
Easy on/off via strap clips  
Ideal for hands-free carrying

### Carry Case

Professional carrying case  
Integrated handle  
Optional shoulder strap  
Easy access to power button, cameras and ports

## Chargers

### Single Bay Battery Charger

Works with standard and extended batteries  
Charge standard battery in 2.75 hours  
Charge extended battery in 3.25 hours

### AC Power Pack

Charge from any standard wall plug

### Screen cleaning cloths

Approved wiping cloth  
Removes dirt and skin oils  
Keeps display clean and smudge free

## Input Devices

### Rugged Backlit Keyboard<sup>1</sup>

Ideal for intensive data entry  
Easily attach and detach as needed  
IP65 sealing  
3.2 ft./1 m drop tested  
Rugged hinge

### Pens

Passive pens  
Active pens (for digitizer displays only)  
1.5 mm pinpoint accuracy  
Makes writing as easy as pen and paper

## Integrated Available Options

### Barcode scanner (XPAD only)

1D/2D imager

### HDMI-in port<sup>2</sup>

Allows the tablet to show a video feed from a set-top box

### Smart Card/CAC Reader (Windows)

FIPS 140-2 compliant  
Ideal for government/military  
Supports over a dozen interfaces

### True Serial (RS232) (Windows)

USB conversion on Android only  
Ensures compatibility with legacy Serial devices without timing issues  
Eliminates USB to serial adapters

### UHF RFID Reader (Windows)

Read tags up to 9.8 ft./3 m  
Mounts on the back of the tablet  
Works in subzero temperatures

# An advanced platform with all the right features

The L10 family is loaded with all the features your workers need to maximize task efficiency and productivity, from world-class processing power and the fastest, most reliable wireless connections to features that streamline workflows, automate data capture and improve workforce collaboration.

## The ultimate in processing power

Whether you choose Windows 10 or Android, you get some of today's latest processors, ensuring blazing fast performance on all your applications to maximize workforce productivity. For Windows models, choose from the 8th Generation Intel® Core™ i7 vPro™ processor with PCIe storage to get the fastest rugged mobile computer in the world to an economical Pentium processor to meet budget requirements. And for Android, the Qualcomm SD660 ensures great performance for all applications.

## Flawless barcode capture\*

Give your workers first-time every time capture of bar codes as fast as they can press the scan button — even if they are dirty, damaged, scratched or poorly printed. The integrated enterprise-class SE47x Series scan engines provides true point and shoot simplicity, a wide field of view to capture large barcodes and an extraordinary working range up to 24 in./60 cm away. (\*Optional on XPAD L10 only.)

## The ultimate in cellular connectivity

4G LTE connects workers all around the world, in urban and remote areas — in vehicles or on foot, indoors or out in the field. And Cat12 technology enables carriers to combine three bands to deliver ultrafast 600 Mbps download and 150 Mbps upload speeds for near instant loading of application and web pages.

## The ultimate in WiFi connectivity

Boosts WiFi network capacity, speed and range with 802.11ac and 2x2 Multi-User Multiple Input Multiple Output (MU-MIMO), which allows access points to communicate with multiple L10s simultaneously via beamforming. And battery cycle times are improved since processing can be shifted from the L10 to the access point.

## First-responder cellular network support

Certification on leading public service networks, including AT&T FirstNet and Verizon Private Network Traffic Management (PNTM), provides first responders with the reliable connections they need when emergencies overload the commercial networks.

## Advanced display

Virtually nothing will stop workers from seeing and entering information. The display works even when wet. Workers can see the display indoors in any lighting condition with the 500 nit display. Workers outdoors can see the display as even in bright sunlight with the optional ultra-bright 1,000 nit View Anywhere® display. And workers can choose how they want to interact with the screen and enter data — a stylus or a finger, even with a glove.

## Front camera for video calls

Technicians and other workers can show remote experts the problem for faster issue resolution and better first-time repair rates, improving customer satisfaction.

## Rear camera for better documentation and collaboration

The 13 MP camera captures highly detailed photos and videos to capture proof of condition, proof of delivery, proof and service and more with the simple press of a button.

# Built-to-last rugged design

Designed and built from the ground up with a rugged design that can handle it all.

## Built tough and tested for it all

- Subzero cold
- Blazing heat
- Cold start
- Waterproof
- Wind-driven rain
- Blowing sand
- Blowing dust
- Drop tested
- Vibration
- Shock
- Thermal shock
- Humidity
- Natural cycle humidity
- Fluid contamination
- Explosive atmosphere
- Altitude

### Waterproof and dust-proof

IP65 sealing with port doors open or closed

Port covers for ease of handling

### Drop-proof

Double testing:

6 ft./1.83 m to plywood over concrete while operating

4 ft./1.2 m to concrete

### Extreme temperatures

Subzero cold: -4° F/-20° C

Extreme heat: 140° F/60° C

### Shock tested

40g operating

Thermal shock tested

### Lightweight magnesium frame

Stronger than steel, lighter than aluminum

Provides strength without added weight

### Certified for hazardous environments

Class 1 Division 2 certified (ATEX models for Europe)

Safe for use in presence of flammable liquids, gases and vapors

### Corning Gorilla Glass display

Provides maximum scratch and-impact resistance in a thicker layer than typical consumer devices

# Maximize performance, value and uptime with Zebra OneCare Support Services

Every day, you count on your Zebra mobile computers, barcode scanners and printers to streamline your business processes to improve efficiency and task accuracy, drive down the cost of doing business and increase workforce productivity. Availability of your Zebra devices is key to the success of your business — and the return on your Zebra investments. With Zebra OneCare Essential and Select Support Services, you get all the features you need to maximize uptime and achieve peak performance, every day your devices are in service. And with our global reach, we offer coverage in practically every corner of the world.

## Choose your service level.

### Zebra OneCare Essential

This service sets the industry bar for service and support, with features that include coverage for accidental damage and normal wear and tear, technical support during your local business hours, 3-day turnaround time on repairs and LifeGuard™ for Android™ security updates to keep your version of Android current and secure. And with Zebra's VisibilityIQ™ it's easy to keep track of all your repair and support cases, Zebra support contracts, which devices are eligible for LifeGuard Android security updates and more — and the status of those updates.

### Zebra OneCare Select

If your business requires maximum device uptime and around-the-clock technical support, Zebra OneCare Select delivers. You get all the entitlements of Zebra OneCare Essential, and more. Live agent technical support is available 24x7. In addition, we maintain and manage a pool of spare devices for you to enable overnight replacement of malfunctioning devices. If a device needs repair, we overnight a spares pool device that we commission with your settings and applications so it is ready-to-use, right out of the box.

### Get security updates you can count on

Your Zebra L10 rugged tablets will last many years — well beyond the typical three years of security support Google offers on any given version of Android. That's why we developed LifeGuard for Android. LifeGuard provides security updates and patches throughout the entire lifecycle of your L10 rugged laptops — available for a total of 10 years with a Zebra OneCare Essential or Select support contract. You can also see when Android updates are available and which devices need the update — but you're always in charge of if and when to accept the update.

### Direct-from-Zebra expertise — and genuine Zebra parts

Our experienced technical support experts are ready to help you resolve virtually any device issue, providing the swift resolution needed to minimize downtime — and its impact on your business. With our solution labs and ability to maintain your customer-specific configurations to accelerate trouble resolution, you're back up and running, as soon as possible. We use only genuine Zebra parts, ensuring that any device that comes through our service depot is returned to Zebra's original manufacturing specifications. And since our experts speak 17 languages, we can provide support in your local language in practically every corner of the world.

### If it's broken, we fix it

With coverage for normal wear and tear and accidental damage, you get the peace of mind that every part of every L10 rugged tablet is covered — from a cracked display or outer casing to a damaged scanner exit window, keyboard or port. And when you need to return a device, it's fast and easy — return requests can be initiated online, anytime of the day or night.

Service availability, service features and/or repair turn-around times may differ by country. Please contact your Zebra sales representative for details.
